Please refer to your response to Interrogatory MMA/USPS-13 and to your response to TW/USPS-6. In response to Part a of Interrogatory TW/USPS- 6, you indicate four items that you have incorporated into the QBRM savings model you say uses the Commission's methodology from R2000-1.

- A. For item number 1, did you make the same assumption with respect to the Miscellaneous Factor page for both QBRM and hand addressed (HAND) letters? If not, please explain why such a change is necessary for QBRM letters but not HAND letters?
- B. For item number 3, did you make the same assumption with respect to the QBRM Density table for both QBRM and HAND letters? If not, please explain why such a change is necessary for QBRM letters but not HAND letters?
- C. For item number 3, did you make the same assumption with respect to mail accepted into the incoming SCF/Prim operation for both QBRM and HAND letters? If not, please explain why such a change is necessary for QBRM letters but not HAND letters?
