

CRA Cost Rollforward Model

The Postal Rate Commission uses the CRA Cost Rollforward Model to replicate the results of the Postal Service's cost rollforward programs and to explore and document the impact of changes to cost forecasts. The recently redesigned model is available for download by participants in Commission proceedings and other interested persons. Programs and data files are provided to replicate (1) USPS costs used in the R2001-1 Request, (2) PRC costs used as the basis of the R2001-1 Opinion and Recommended Decision, and (3) FY 2002 costs.
